Technique

Starting Point	Pre-lighten hair to a very light blonde level 10 Affinage Professional recommends the use of Infiniti Lite (blue or white) Powder Lightener
Feature Colour	1 part Infiniti Satin 10.52 + 2 parts Infiniti Satin Activating Crème
Global Toner	1 part Infiniti Toner - Ice + 1.5 parts 3% Infiniti Developer

Steps

1. Pre-lightened hair to a level 10.
2. Feature colour placement - begin at the front right side, take a section above the ear following the hairline (see section 1), place 2 diagonal foils back to back creating a rectangular section, take another foil above the first towards the top of the head, place back to back.
3. Take a parallel diagonal section from behind the ear, place 3 woven foils moving toward the top of the head (see section 2).
4. Taking a 3rd diagonal section (see section 3), brick pattern, placement, apply feature colour in 2 back to back foils creating a rectangular section.
5. Taking a 4th diagonal section (see section 4), apply the feature colour to a weaved slice directly behind section 3. Process for 10 minutes.
6. When foils have processed for 10 minutes mix and apply global Infiniti Toner - Ice to the remaining hair. Process for 5 minutes, rinse hair lightly shampoo with White Ice Treatment shampoo & conditioner.

Tip: The model shown has heavy layering around the front (hairline), if heavy layering is not an option, consider starting the first section with zig zag placement as apposed to back to back placement for a softer effect.

Styling: Spray on Sapphire Ice Defender thermal guard then lightly mist using Sapphire Ice Sea Salt Spray. Blowdry the hair into place, smoothing down fringe section. Once dry team with Sapphire Ice Sea Salt Wax to create a tousled and texturised look.
