# Trend 16

## Technique

Natural Base	5
Global Colour & Section 3	4.221 + 3% Infiniti Developer
Feature Colour	Intense Reds Magenta + 9% Infiniti Developer

## Steps

1. Decide on placement of windmill (centre/off centre etc) at top of head.
2. Begin by creating section 3 at the centre of the windmill shape.
3. Pivot 5 individual sections around section 3 (see diagram), sections 1 & 2 (see diagram) become the feature colour.  
Note: Pivot sections are broken into 2 separate foil sections.
4. Mix and apply Feature colour to sections 1 & 2, pivoting around section 3 until windmill shape is complete.
5. Mix and apply global colour to remaining hair including section 3, process for 30 minutes.

## Colouring Tips

1. The size of section 3 will impact on the amount of exposed feature colour. A larger circle creates less feature, allowing exposed feature colour to come from underneath the top section of hair. A smaller circle creates more exposed feature colour on top of the head.
2. Take part lines into consideration when placing sections 1 & 2 to ensure the exposed feature colour is suitable for the shape and direction of the haircut.
3. Variation of depth & tone can be created within the feature colour by using 2 separate colour mixes. i.e. section 1 mix and apply Intense Red Magenta + 3% Infiniti Developer, section 2 mix and apply Intense Red Magenta + 9% Infiniti Developer.

## Styling:

Protect the hair prior to blow drying by spraying with Sapphire Ice Defender thermal guard. Smooth round brush the hair until dry, soften the flyaway hair strands by lightly applying Essential Oils 24/7 Heaven cuticle sealer. Hold in place with Sapphire Ice Enforcer, for added gloss spritz with Sapphire Ice Glazer shine spray.
